3. Deck Images introduces the E2A Kit Series of glass and aluminum railing systems. The 36-in.-high kits are available in both 6-ft. line and 6-ft. stair sections and are made from high-grade aluminum to ensure strength, durability and rust resistance. The powder-coated components come in green, clay, white or black.

4. Travis Industries unveils its outdoor Tempest Gas Torch. Designed to display and reflect a unique flame presentation, the Tempest features a spinning, spiral-like flame with an open-aired, rectangular ceramic glass housing. Available to run off attached gas lines or a 5-gal. propane tank, the Tempest puts out up to 20,000 Btu and can be manually ignited with the built-in piezo igniter.

5. Maine Ornamental has introduced an all new solar post and stair light that adds an intimate glow to decks and fences. The solar post and stair light is available in black or white and is available in sizes that accommodate 4x4 or 6x6 posts. A top-mounted solar lens and a rechargeable battery power a long-lasting LED bulb.

7. TimberTech recently introduced its new line of low-maintenance decking boards, XLM. These boards can be color matched with TimberTech's RadianceRail in XLM colors. RadianceRail is made from TimberTech composite capped with a durable PVC layer, giving it the sturdy and structural feeling of a wood railing. RadianceRail comes in five XLM colors.
