- 5/32" Hex wrench
- DVD
- Handle assembly:
 - (4) Washers
 - Bushing
 - Cam
 - Nut

Installation

1. Remove the two screws on the front of the heater using the included 5/32" hex wrench. Attach the ashlip to the stove using the two screws.

AGP Stove or Insert Lopi Door Installation Instructions (SKU 96100774)

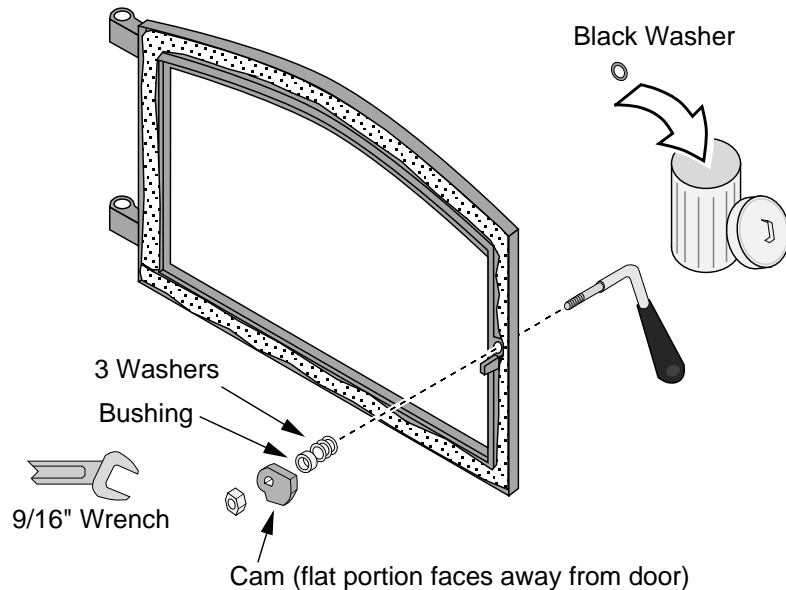

- Grasp the door at a 90° angle and slide the door hinge over the hinge pins on the front of the stove.

- Attach the handle assembly as shown to the right.

NOTE: Discard the black washer included with the door handle assembly.

NOTE: As the gasket compresses through use, one of the inner washers may be moved to the opposite side of the cam to allow a more secure door fit.

- Shut the door and twist the door handle so the door is securely shut.

NOTE: You may need to open and close the door repeatedly to compress the door gasket.
