GreenSmart™ Gas Fireplaces

America’s favorite Fire

Lopi heating appliances are designed and hand-assembled at our state-of-the-art plant in Mukilteo, Washington. With 30 years of experience manufacturing innovative hearth products, Lopi has gained a reputation for standing behind every single product we make. And one thing that hasn’t changed through the years is the quality of the construction, the beauty of our fireplaces, performance you can trust, along with our commitment to your satisfaction.

Whether you are new to the family of Lopi heating products or already a part of our family, we invite you to take a look at our new GreenSmart gas fireplaces. We know you’ll find your favorite fire.

How Do You Say Lopi?

We hear a lot of different pronunciations - Lopey...Loopee...Loppy!

It’s actually pronounced Low-pie, and was created by our president, Kurt Rumens. The name was inspired by a love of the Northwest, a fascination with Native American culture and the nature and wildlife that live in this beautiful place. Lopi means beauty, strength and independence and has become a legend all its own.

Why Choose a GreenSmart Direct Vent Gas System?

The American Lung Association discourages the use of vent-less fireplaces for health and environmental reasons. They recommend homeowners choose only sealed, direct vent gas fireplaces to preserve indoor and outdoor air quality and to prevent by-products such as carbon monoxide, soot and nitrogen dioxide from entering your home. In direct vent installation, combustion air is drawn into a sealed firebox and flue gases are exhausted through a co-linear or co-axial intake/exhaust pipe. Direct vent gas fireplaces also prevent excess moisture from building up in your home. All Lopi direct vent gas fireplaces are sealed and meet the guidelines of the American Lung Association’s Health House program.

Seven Year “Real World” Warranty

Lopi’s “Real World Warranty” puts other manufacturer’s lifetime warranties to shame. You will have peace of mind knowing that your gas fireplace is supported by certified factory trained installers and retailers. The firebox on Lopi gas fireplaces is covered for a FULL SEVEN YEARS. All parts and labor are covered for a FULL 2 YEARS. Compare our warranty to other manufacturer’s and you will find most won’t tell you about their one year parts warranty or that there is no labor coverage after the first year on ANYTHING! Lopi truly offers the BEST WARRANTY ON GAS APPLIANCES!

“After 30 years, Lopi is not so much a brand name as it is a tradition. Lopi hearth appliances are made to the highest standards in craftsmanship and construction by America’s premier stove builders. We take as much pride in building our products as do the families who own them. We invite you to share this proud tradition.”

Kurt Rumens
President
Lopi offers direct vent gas fireplaces in five different GreenSmart models to meet the specific heating requirement, size and application within your home. In fact, Lopi provides models that can be used in virtually every room of your home. This includes the outdoor room. All Lopi fireplaces are approved for outside installation when used under protected eaves or under a covered deck or patio. Lopi gas fireplaces feature an “Electronic” ignition system with a battery back-up that allows you to operate your gas fireplace even during power outages.

You will find this brochure is divided by the different fireplace models available. Each section outlines all the beautiful options available by model. Picture the irresistible appeal of fire, framed in unique and rich metalwork. Finishes include the rustic, hand-finished Independence face, or the universally appealing Wilmington face design in both black painted or brushed nickel. Choose the fireplace or fireplaces to make your vision a reality.

Once you have chosen your fireplace determine how you would like to have it installed. All of our fireplaces provide for horizontal or vertical venting through the outside wall or ceiling, allowing you to install your fireplace virtually anywhere in your home. All fireplaces include easy to convert LP (Propane) conversion kits at no additional cost.

**Burn Clean, Green and Efficiently**

Lopi gas fireplaces are highly efficient and a great way to reduce your current heating bills. Another effective way to save money on your heating bill is to consider “zonal heating”. By using your gas fireplace or fireplaces to selectively heat only the rooms you use, you can greatly reduce the amount of energy you need to heat your home - and save money!
The patent-pending GreenSmart™ System is the most innovative collection of components, controls and technology that when combined provide an elegant, smarter and greener way to heat your home. Innovative standard features include: accent lights, flame adjustments and a choice of pilots. An optional GreenSmart remote allows you to run the fireplace in “Smart Thermostat Mode” that automatically adjusts the heat output based on the temperature setting – so the flame will modulate up/down as opposed to shutting off/on like normal thermostats. This conserves fuel and maximizes heating ability while extending the viewing pleasure of the fire.

**Basic GreenSmart Control System**

This dashboard is located at the bottom of the appliance and is operated manually. It has five components:

3. Variable Flame Control: Adjusts flame and heat up and down.
4. Two Position Pilot Selection: Push up for continuous pilot and down for GreenSmart Pilot.
5. Comfort Control Module Includes:
   - Comfort Control: This ON/OFF rocker switch electronically turns the rear portion of the burner on/off.
   - Battery Back-Up: Allows you to operate the burner during power outages.
   - Main Burner Switch: This switch turns the burner on/off.

**Glide-Away™ or Drop Down Concealment Door**

The control valve and wires are hidden by our new concealment door to provide an elegant, more finished appearance. The concealment door conveniently opens and closes for easy access to the controls.

On some models, the control area is hidden by a concealment door that lifts up and glides away. On other models it drops-down for easy access if control adjustments are desired.

**Highly Visible Dashboard**

The GreenSmart basic controls of the unit are located on a black dashboard behind the concealment door.

All controls are clearly labeled with white silk-screened lettering for easy reading.

**Control Panel Lighting**

When the concealment door is opened, control panel lighting is automatically turned on to make viewing controls on the dashboard easy even in a low light environment in the home.
**GreenSmart Split-Flow Burners**

We make gas fireplaces in several sizes for different heating needs. Your fireplace will be equipped with either the Dancing-Fyre or the Ember-Fyre burner. Both burners come with highly detailed logs and are designed to provide an incredibly realistic “wood-like” fire.

**Dancing-Fyre™ Split-Flow Burner:**

The Dancing-Fyre™ is found in our Bostonian SS, Hearthview TRV and Hearthview ST gas fireplaces and features a split-flow steel burner. The front and rear burners can be operated together for maximum heat output and flame appearance or with only the front burner for an impressive turn-down ratio. This flexibility allows for a continual flame appearance when lower heat output is needed and provides a smarter, greener way to heat the home.

**Ember-Fyre™ Split-Flow Burner:**

The award-winning Ember-Fyre™ gas burner technology is found in our 21TRV and HO gas fireplaces. The Ember-Fyre is known for its gorgeous, yellow-flame fire with flickering embers—it is a split-flow ceramic burner where the front and rear burners can be operated together for maximum heat output and flame appearance or with only the main burner for an impressive turn-down and heating range.

**Choice of Pilots**

**Continuous Pilot or GreenSmart Pilot:**

This switch allows you to run your fireplace in either standing pilot mode—where the pilot flame continually stays on, ideal during periods of extreme cold when a draft is needed for safe, reliable operation. For maximum efficiency use the GreenSmart mode, where the pilot flame ignites via an intermittent pilot (IPI) spark that does not run continually and thus conserves energy when the fireplace is not being operated. The GreenSmart system includes a battery back-up, ensuring proper ignition even during power outages.

**Comfort Control™ Features:**

With the push of a button your Comfort Control will turn off the rear burner while leaving the front burner on for an attractive flame appearance when heat output is not the priority. This feature delivers a turn-down ratio of up to 72 percent! It works with the Green-Smart split-flow burners, and offers a more efficient way to heat the room by only burning the correct amount of fuel to keep a constant temperature; so this is another smarter, greener way to enjoy fire in the home.

**Accent Lights**

Accent Lights are a standard feature in all GreenSmart fireplaces. Lights add a warm glow to both the logs and optional ceramic fireback and can be used when the fire is on or off. Perfect as a nightlight or soft indirect light for the room, the Accent Light allows visual enhancement of your fireplace 365 days a year.

**GreenSmart Fuel and Cost Savings**

**Example:** A standing pilot fireplace uses .552 therms of gas each day. The average therm of natural gas is $1.10, or $0.60 to run every day—no matter if the fireplace is on or off. 365 days of standing pilot usage equates to 201 therms of gas or $219. Propane can run up to three times this cost.

The Green Smart System helps you save on both energy usage and your heating bill.
Optional Arabesque Grills

Shown here are optional grills in the classic floral Arabesque design. Finished in a nickel plating, these grills can be added to both Looking Glass and Wilmington face designs.
Lopi’s heater-rated 21 TRV Portrait-Style gas fireplace is a cozy and convenient way to provide the warmth and beauty of fire to areas not normally considered for fireplaces. It’s designed for corners or limited space installations in small intimate settings such as bedrooms, baths, dining rooms and kitchens. This fireplace has the flexibility to be installed at eye level or directly on the floor. Compact and easy to install, the applications are unlimited. The Lopi 21 TRV also features the Award Winning Ember-Fyre™ burner system. The Patented Split-Flow Ember-Fyre burner produces such an incredibly wood-like fire it was awarded the prestigious “Best of What’s New” Award by Popular Science®.

**Features**
- Heater rated GreenSmart technology.
- Top vent or rear venting option
- Only 13 1/2” deep, fits virtually any space.
- Huge 394 square inches of high temperature ceramic glass for fire viewing.
- Comfort Control™ gas valve allows you to turn off part of the burner when less heat is required.
- Patented Split-Flow Ember-Fyre™ burner for incredibly realistic wood-like flame and glowing embers.
- Winner of the prestigious VESTA Award for “Best New Gas Fireplace”.
- Accent light standard feature.

**Specifications**
- Heats up to 650 square feet.
- Maximum Input in Btus per hour: 16,500 (NG & LP)
- Huge Turndown Rate: Minimum input in Btus per hour: 6,000 (NG), and 5,000 (LP)
- Steady State Efficiency: Up to 82.2% (NG), 79.5% (LP)
- Canada EnerGuide Efficiency: 63% (NG), 63% (LP)
- Propane (LP) conversion kit comes standard at no additional cost.
- Optional 90 CFM Convection Fan

Discover Your New Favorite Fire
Bostonian - Space Saver™

Join the Lopi tradition by heating your home with the Lopi Bostonian Space Saver gas fireplace. Compare for yourself - at Lopi we build only the highest quality fireplaces. We start with a heavy-gauge steel firebox for quality inside and out. Notice the detail and beauty in the logset, the warm glowing fire and the decorative faces available for the Bostonian fireplace. The design of the Bostonian allows you to add the beauty of fire with a large viewing area while giving you control over heat. The huge heat turn-down rate makes the Bostonian fireplace ideal for smaller rooms such as bedrooms and dens and for those that don’t require a large amount of heat, but still want to enjoy a beautiful fire year-round.

Features
- Heater rated GreenSmart technology.
- Thin profile - only 16 1/4" deep.
- 564 square inches of fire viewing glass.
- Removable safety screen in front of glass.
- Split-Flow Dancing-Fyre for realistic flame pattern.
- Comfort Control™ gas valve with adjustable flame control.
- Top or rear vent option for maximum installation options.
- Easy to adjust air shutter for a beautiful fire.
- Shut-off valve included in fireplace.
- Durable 16 gauge steel construction.
- Standard accent light

Specifications
- Heating Capacity: 950 square feet with fan
- Maximum input in Btus per hour: 20,500 (NG & LP)
- Huge Turndown Rate: Minimum input in Btus per hour: 5,100 (NG), 4,200 (LP)
- Steady State Efficiency: 76.5% (NG), 78.3% (LP)
- Canada EnerGuide Efficiency: 67.7% (NG), 70.1% (LP)
- Propane (LP) conversion kit comes standard at no additional cost
- Optional 180 CFM Convection Fan

Options
Cast Iron Andirons
Make your fireplace even more authentic with one of our classic cast iron andiron sets.

Six Decorative Fireback Designs
Decorate the inside of your fireplace with one of our ceramic or stainless steel firebacks.
The Hearthview TRV is shown with the Independence Double Door face and the Brick Fireback Liner option.
Hearthview TRV
The Hearthview TRV is perfect for warmer climates, smaller spaces, or a beautiful, decorative fire all year long. It offers a wide BTU turn down range for more heat flexibility and flame viewing options. A wide range of face styles and options are also available to match any room decor. The Hearthview TRV features 864 square inches of tempered glass with a child-safe mesh screen in front. The screen is removable if desired.

Ultimate Flame Regulation
You have virtually unlimited flame variation with our Comfort Control™ valve and the Flame Height Adjuster switch. Use all 31,000 BTU’s of flame on the coldest winter nights or turn it down to only 6,700 (NG) or 5,200 (LP) for a romantic firelight on a warmer night. Enjoy a full flame fire with maximum height. Use the Flame Height Adjuster switch to lower the flames when you want less heat or use the Comfort Control™ valve to turn off the rear burner completely for a darker, more romantic fire and less heat.

Features
• Heater rated GreenSmart technology.
• No hearth required.
• 864 square inches of tempered viewing glass.
• Removable safety screen in front of glass.
• Split-Flow Dancing-Fyre burner for realistic flame pattern.
• Standard wall switch included.
• Comfort Control™ gas valve with adjustable flame control.
• Move heat to one additional room with the optional Extra Room Power Heat Duct Kit.
• Accent light standard
• Top or rear vent option for maximum installation options.

Specifications
• Heating Capacity: 1,400 square feet with fan
• Maximum input in Btus per hour: 31,000 (NG & LP)
• Huge Turndown Rate: Minimum input in Btus per hour: 10,000 (NG), 8,000 (LP)
• Steady State Efficiency: 80% (NG), 81% (LP)
• Canada EnerGuide Efficiency: 68.4% (NG), 67.8% (LP)
• Propane (LP) conversion kit comes standard at no additional cost
• Optional 180 CFM Convection Fan

**Hearthview HO (High Output)**

The Hearthview HO GreenSmart is designed for complete home heating as well as for year-round enjoyment. With the widest BTU turn down range of any fireplace, you get more heat flexibility and flame viewing options. On high you can easily heat up to 2,500 sq. ft. Don’t need that much heat? Turn down the flame height of the Award-Winning Ember-Fyre™ burner and enjoy the beautiful fire. Want to use your fireplace for mostly ambiance? Use the Comfort Control™ to turn off the rear burner and enjoy the glowing embers and front fire without all the heat.

**Ultimate HOME HEATER**

The Hearthview HO was designed for high efficiency and close clearances to combustibles. Using space age “Film Cooling” technology along with a built in heat exchanger and specially designed convection chamber, the Hearthview HO pulls an amazing amount of heat off the fireplace and directs it into your home. This reduces the amount of heat left in the fireplace thus reducing top and side clearances, which allows you to have up to a 12” deep mantle only 16” above the top of the face. The fireplace also features an adjustable 260 CFM convection fan to enhance air movement and heat transfer and 5mm silica coated neoceramic safety glass that promotes radiant heat transfer out of the fireplace and into your home.

**Features**

- Heater rated GreenSmart technology.
- 8" top or rear vent options - top vent vertical termination can be reduced to 6" vent.
- No hearth required.
- 864 square inches of 5mm silica coated NeoCeramic safety glass.
- Award winning Ember-Fyre™ burner for realistic flame pattern.
- Standard wall switch included.
- Standard accent light included.
- Add heat to one or two additional rooms in your home with the optional Room Power Heat Duct Kit.

**Specifications**

- Heating Capacity: Up to 2,500 square feet
- Maximum input in Btus per hour: 46,700 (NG & LP)
- Huge Turndown Rate: Minimum input in Btus per hour: 12,500 (NG), 9,000 (LP)
- Steady State Efficiency: 81.5% (NG), 81% (LP)
- Canada EnerGuide Efficiency: 71.1% (NG), 72.2% (LP)
- Propane (LP) conversion kit comes standard at no additional cost
- 260 CFM Twin Convection Fan

**Options**

**Five Decorative Fireback Designs**

Decorate the inside of your fireplace with one of our beautiful ceramic firebacks. A fireback is required in all Hearthview HO installations.

- Reversible Fireback Basketweave/Vertical Quilt*
- Hand-Made Brick

**Cast Iron Andirons**

Make your fireplace even more authentic with one of our classic cast iron andiron sets.
Hearthview™ See-Thru GreenSmart Gas Fireplace

This side of the Hearthview ST is shown with the Wilmington face in black painted finish with the Brick Fireback Liner option.
Hearthview See-Thru

A home is a combination of dreams and choices, each a reflection of you. From the most intimate engraved details on a fireplace face to the grandest of fires, our fireplaces bring a sense of style to your home.

The Hearthview See-Thru maintains this style with a perfect balance between the firebox, logs and flames. The logs and fire have been carefully designed to give a different look from either side. Compare the amazingly realistic nine-piece log set with any other see-thru fireplace on the market! The unique split-flow Dancing-Fyre burner will give you a warm, yellow fire with glowing embers that your friends and family will have a hard time telling apart from a real wood fire! The Hearthview See-Thru features tempered glass with a child-safe mesh screen in front. The screen is removable if desired.

A Fireplace With Two Points of View

With two sides to the Hearthview See-Thru Fireplace you can personalize each room using a different face on either side of the fireplace. Choose from the Basic Grill Set, or pick one of the 5 beautiful upgrade faces (see page 8).

Features

- Heater rated GreenSmart technology.
- No hearth required.
- 864 square inches of tempered viewing glass on each side.
- Split-Flow Dancing-Fyre burner for realistic flame pattern.
- 9 piece log set - provides a different log look from either side.
- Comfort Control™ gas valve with adjustable flame control.
- Move heat to one additional room with the Extra Room Power Heat Duct Kit.

Specifications

- Heating Capacity: 1,500 square feet with fan
- Maximum input in Btus per hour: 37,500 (NG & LP)
- Huge Turndown Rate: Minimum input in Btus per hour: 14,700 (NG) & 10,000 (LP)
- Steady State Efficiency: 79.5% (NG), 80.1% (LP)
- Canada EnerGuide Efficiency: 70.77% (NG), 70.71% (LP)
- Propane (LP) conversion kit comes standard at no additional cost
- Optional 130 CFM Convection Fan

Comfort Enhancements for all Gas Fireplaces

Wall Thermostat
Gives you hands free and worry free control of your home’s temperature. Just set the desired temperature you wish to keep your home. Your fireplace will turn on and off maintaining your preset choice.

Quiet Convection Fan
Heat your home even faster with an internal convection fan. The fan forces heat into the room and throughout your home by enhancing the fireplace’s natural convection. It also turns on and off automatically to maintain the set temperature of the room, when used with either remote or wall thermostat. Convection fans are optional on all models except the HO fireplace.

GreenSmart Remote Control System
This upgrade option allows you the ease of controlling your GreenSmart system from the hand-held GreenSmart remote. All basic features are controlled via the hand-held remote control, which includes thermostat function, control of the flame, Comfort Control ON/OFF function, optional convection fan and accent light control along with the “Smart” Thermostat feature.

• Standard Thermostat Mode Controls:
  - Fire ON/OFF and heat/flame height adjustment
  - Thermostat Control Setting
  - “Smart Mode” Control Setting
  - Optional Fan ON/OFF and speed adjustment
  - Accent Light ON/OFF
  - Comfort Control ON/OFF

• “Smart” Thermostat Mode:
When using the remote in “Smart” mode your fireplace will automatically adjust the heat output and flame height based on the temperature you selected on the thermostat setting. The flame will not shut off, but will modulate from low to high, or high to low until the set temperature is reached, thus conserving fuel and maximizing heating ability to extend the viewing pleasure of the fire. The “Smart” mode also keeps the flame and blower operation closer in sync. When the desired room temperature is reached the flame will turn off. Since the fireplace has gradually decreased the fire and internal firebox temperature your convection fan will now run for a shorter period of time after the fire has gone off which will save energy.
Comfort Enhancements for all Gas Fireplaces

Power Heat Duct Kit
This optional venting configuration delivers heat to an upstairs, downstairs or adjoining room within 20 feet of the fireplace. The Hearthview TRV and Hearthview ST can utilize one Power Heat Duct Kit sending heat to an additional heat zone in your home while the Hearthview HO has the option of adding one or two Power Heat Duct Kits. The 21 TRV Portrait-Style fireplaces and Bostonian SS do not use the Power Heat Duct Kit.

Essential Oil Collection Includes

On Cloud Nine™
Lavender oil to calm and relieve stress. It can also help you sleep.

Somebody Wake Up Edna™
Made with Eucalyptus oil to stimulate and energize. It improves mood as well as memory.

Passion Potion™
Uses Ylang Ylang to excite the senses with a sensual, intoxicating fragrance that is perfect for romance.

Firescreen for Child Protection
Children, like most of us, are fascinated by fire, and for families with young children, fireplaces pose a potential safety hazard. Take the time to educate young children about the dangers of fire and the hot surface temperatures of glass and metal surrounding the fireplace. If you have an infant or toddler consider installing a fire screen; make sure it’s tall enough so that children can’t climb over it, and that it’s placed far enough away so that reaching arms can’t touch the surfaces of the fireplace. A few precautions such as these will allow everyone in your home to safely enjoy the comfort and warmth of your new gas fireplace.

Aromatherapy Option
Only Lopi fireplaces offer you the option to add Aromatherapy. The heat of the fire slowly releases essential oil scents from the hidden Aromatherapy tray into the room to soothe, relax or energize you. No need to worry about candles left unattended, just turn on your fireplace and enjoy the experience. The Aromatherapy and Essential Oil Option is available on the 21 and all Hearthview fireplaces. Ask your Lopi dealer for a demonstration.

**PERFORMANCE**

*Gas appliance performance can be affected by negative pressure in the home and by prevailing atmospheric conditions. Efficiency may vary depending on vent configuration and atmospheric conditions. Contact local building or fire officials about restrictions and installation requirements in your area.*

- **Heating Capacity**
  - Up to 650 Sq. Ft.
  - Up to 950 Sq. Ft.

- **BTU Input High/Output Low (NG)**
  - 16,500 (high) 6,000 (low)
  - 20,500 (high) 5,100 (low)

- **BTU Input High/Output Low (LP)**
  - 16,500 (high) 5,000 (low)
  - 20,500 (high) 4,200 (low)

- **Steady State Efficiency** (maximum venting)
  - 82.2% (NG) 79.5% (LP)
  - 76.5% (NG) 74.2% (LP)

- **Canada EnerGuide Efficiency**
  - 63% (NG) 63% (LP)
  - 67.7% (NG) 70.11% (LP)

**COMBUSTIBLE CLEARANCES**

The Portrait-Style 21 TRV fireplace requires a 1" minimum clearance from face to sidewall. Combustibles can be installed up to the standoffs on the unit. If a mantel is used please see Owner's Manual for minimum clearances.

The height of the Portrait-Style 21 TRV fireplace enclosure must be a minimum of 48" above the base of the fireplace.

If placed on a raised hearth, the ceiling above the Portrait-Style 21 TRV must be at least 57" measured from the base of the fireplace.

- **A** = 38 1⁄2" (measured from base of fireplace)
- **B** = 0"
- **C** = 1"
- **D** = 0"
- **E** = None Required
- **F** = None Required

*0 to 12" maximum mantel depth. See Owner's manual for details*

**TESTING & INSTALLATION INFORMATION**

Tested and listed by Omni Test Laboratories, Inc. and Intertek Testing Services to: ANSI Z21.88b-2001 “Vented Gas-Fired Direct Fireplace Heater”. Must be installed in accordance with all local codes, if any: if not, follow ANSI Z223.1 and the requirements listed in the Owner’s Manual.

---

**NOTE:** Improper installation of your gas appliance or failure to operate it in accordance to the guidelines detailed in the Owner’s Manual may negate your warranty and endanger your home and family. Installation information is available on our website at: www.lopistoves.com.

We recommend all Lopi appliances be installed and maintained on an annual basis by your authorized Lopi Specialty Hearth Retailer.
Only the most professional specialty hearth retailers are selected to sell Lopi stoves, inserts and fireplaces. They represent our total commitment to exceptional products and excellent service. In addition, they have successfully completed special training programs in the proper selection, installation and service of all Lopi products.

Your professional Lopi hearth dealers are experts who can advise you on everything from customizing the color of your appliance to selecting appropriate venting and chimney materials. They can show you Lopi models on display, including working models actually burning.

Lopi produces a wide variety of quality wood, pellet, gas and electric hearth products. Ask your dealer for details.

Find your favorite fire today by visiting www.lopistoves.com

Lopi products are made in the U.S.A. with pride.
